Scheme: Default IDE

Settings may be overridden by EditorConfig [Disable](#)

Set from

Imports

Use fully qualified class names in JavaDoc: If not already imported

Class count to use import with '\*': 999

Names count to use static import with '\*': 999

Packages to Use Import with '\*'

Static	Package	With Subpackages
<input type="checkbox"/>	import java.awt.*	<input type="checkbox"/>
<input type="checkbox"/>	import javax.swing.*	<input type="checkbox"/>

結開發規範有提到 Java 檔案內的 import 語句不使用通配符號 (\*)

那就設定成 999 來滿足規範
